

DEVRSHI SHAILESH YADUVANSH

📍 Navi Mumbai 400705

📞 9987124856

✉ devrshi.yaduvansh@gmail.com

SUMMARY

Motivated Electronics and Telecommunication Engineering student with a focus on Embedded Systems, IoT, and Software Development. Strong technical skills in software applications and time management. Eager to apply knowledge in a professional environment while contributing to innovative projects. Experienced in data entry and customer relations, with a proven ability to quickly learn and adapt.

SKILLS

- Embedded Systems
- Microcontrollers
- Circuit Simulation
- C
- C++
- Java
- Python
- Data collection
- Networking fundamentals
- Agile practices
- Problem-solving techniques
- Project coordination
- Team collaboration strategies
- Organizational skills
- Presentation skills
- Effective communication
- Community outreach

EXPERIENCE

EESA PR MEMBER, 03/2026 - Current

Member, Navi Mumbai

- Coordinated media outreach to increase public awareness of organizational activities, resulting in greater community engagement.
- Contributed to team brainstorming sessions, generating innovative campaign ideas and strategies that aligned with organizational goals.
- Organized logistics and materials for events, ensuring smooth execution and participant satisfaction.

GENAI PR SENIOR MEMBER, 08/2025 - Current

Senior Member, Navi Mumbai

- Executed daily responsibilities with attention to detail and efficiency.
- Engaged with diverse coworkers to resolve product and service issues, enhancing team collaboration and goal achievement.
- Coordinated with team members to fulfill project objectives and ensure timely completion.

INTERN, 03/2026 - 04/2026

Codec Technologies, Navi Mumbai

- Executed logic design utilizing gates, flip-flops, multiplexers, and counters.
- Understood VLSI design flow fundamentals, including simulation and verification processes.
- Conducted circuit simulations and testing with tools such as ModelSim or Cadence.
- Analyzed timing behavior and propagation delays in digital circuits.
- Acquired knowledge of HDL (Verilog/VHDL) for effective digital system modeling.
- Explored CMOS technology and scaling concepts relevant to VLSI design.
- Assisted in debugging and optimizing circuit performance based on simulation outcomes.

EDUCATION

Terna College of Engineering, Nerul, Navi Mumbai, 03/2026
B.E.: Electronics & Telecommunication Engineering
Second Year (Pursuing)

Jaipuria School, Navi Mumbai, 06/2024
Higher Secondary Certificate: 12th STD

Ryan International School, Navi Mumbai, 06/2022
Secondary School Certificate : 10th STD

ACADEMIC EXPOSURE

- C Programming & Problem Solving
- Object-Oriented Programming (C++, Java)
- Basic Python Scripting
- Digital Electronics and Logic Design
- Embedded Systems Development using Arduino & ESP32

PROJECT SECTION

- RC car
- Landmine Detection
- Hand Gesture Controlled Drone
